## International House Proposed

By RAY HORNBACK

An International House, which would house foreign students attending UK, was proposed this week by a group of foreign students who live in the Barracks and private residences.

The foreign students feel that such a residence would serve as "a home away from home, a center of activities

for the foreign students, and a workshop for any student who is majoring in foreign languages.

The group said that most foreign students now pay from \$5 to \$8 weekly rent. They asked, "Why not use the money, so spent, to pay over a period of years on an International House? The University would furnish the house, and rental over the years would pay for it."

Dr. Frank D. Peterson, comptroller, said, "We think an International House would be good, but there must be some organized group to promote the plan. There also would have to be a further plan submitted to liquidate the cost of the project."

"The school is not too small to support such a project." said Dr. A. E. Bigge, foreign student advisor, "but it would take quite a lot of planning."

Dr. Bigge pointed out that many universities throughout the country have International Houses which are operated on a successful basis.

In a survey conducted by the foreign students, 50 male students said they would live in the proposed house.

## Lexington Plans Medical Center

By JIM CRAWFORD

The proposed UK medical school entered the news again as reports were circulated concerning the construction of a Lexington medical center.

At the same time a UK graduate was appointed managingdirector of the Kentucky Medical Foundation. He is Russell E. White of Lexington.

An important part of the medical center plan would be the building of a new \$5,000,000 St. Joseph's Hospital with a psychiatric department that would take the place of a present Lexington hospital.

Very probably the new 300 bed hospital would be located reasonably near the UK Experiment Station farm, which an un-named source said was the logical site for the medical school. Also included

The new hospital sites mentioned

1. The present location of Our Lady of The Oaks Hospital on the Harrodsburg Road near the Camp-

2. A site farther south than the Campbell House.

3. A tract in the southern end of Lexington, not far from the Chevy Chase subdivision.

Establishment of such a center would group St. Joseph's Hospital, the Lexington Clinic, and the new Baptist Hospital, all in the vicinity of the Experiment Station with the Good Samaritan Hospital fairly

## Convocation To Open Religious Emphasis Week

Religious Emphasis Week

Plans for the coming Religious Emphasis Week are discussed by the co-chairmen, Sydney Fitch and John Fischer. The week of March 7 has been chosen for the school-wide observances. A convocation in Memorial Coliseum will begin the religious ac-

All third hour classes in all colleges will be dismissed at 10 a.m. Monday, March 7, for a campus-wide student convocation in Memorial Coliseum to open this year's Religious Emphasis Week at the University.

Dr. Glen Olds, chaplain at the University of Denver, will be the speaker at the opening convocation. His subject will be "Idol

The convocation has been endorsed by SGA, Interfaith Council, Panhellenic Council, Interfraternity Council, and the University Faculty Committee.

March 8 through 10 are the days reserved for UK activities in Religious Emphasis Week. It is sponsored by the Interfaith Council, which is composed of 14 student religious groups. Local churches and organizations also participate in the three-day event.

Activities of the week will include faculty-student committee breakfasts each morning, class room speakers, afternoon coffee hours, discussion leaders in residence halls, fraternities, sororities, and student organizations.

Nightly convocations will be held from 7 to 8 o'clock each of the three days in Memorial Hall. During these night sessions Dr. Olds will speak on "The Failure of Success," "The Objects of Subjects," and "The Logic of Love."

Other speakers and discussion leaders on campus for the week

will be: (1) Lt. Col. George W. Almond, Deputy Post Chaplain, Fort Knox. (2) Rev. T. B. (Scotty) Cowan, Lexington minister. (3) Father Garvey, Villa Madonna College, Covington. (4) Rabbi Joseph Rauch, Louisville. (5) Mrs. Theodore O. Wedel, professional church worker, Washington, D. C. (6) Dr. Paul Holmer, head of Philosophy Department, University of Minne-

The theme for the 1955 Religious Emphasis Week is "God and the Campus." The purpose of the week is "to show students that security found anywhere except in God is superficial and inadequate."

#### Greek Work Day

The pledges from all the UK fraternities and sororities will combine tomorrow for the annual Greek Work Day. Work will be done on several charitable and civic projects.

Pledges will meet at 1:30 a.m. at the Student Union for assignments.

A banquet will be held for the pledges at 6 p.m., Wednesday.

Love Reigns At Mardi Gras

Rex, Prof. Daniel Jacobsen, and his lovely queen, Jackie Love, are shown shortly after their coronation at the Mardi Gras Ball, Saturday night. Prof. Jacobson was chosen UK's most popular professor by the student body. Jackie, Arts and Sciences junior and a member of Kappa Delta sorority, was selected queen in last week's elec-

#### **Sunday Concert** To Feature Wright

Dr. Kenneth Wright, violinist, will be featured in a concert Sunday at Flemingsburg. Dr. Wright is professor of music here at the

The concert will also include the University String Quartet, composed of Dr. Wright, Joseph Pival, string teacher in Lexington city schools, Marvin Rabin and Gordon Kinney, both members of the University music faculty.

Nathaniel Patch, pianist, will accompany Dr. Wright in his solo selections.

This concert will include Kentucky Folk Tunes which were arranged by Dr. Wright. This will mark the first time this arrangement of the folk tunes has been presented.

This same program will be given March 6 in the Guignol Theatre as part of the Sunday Afternoon Musicale series.

## Cadet Band Is Formed On Campus

Co-operation between the camp is AFROTC units and the Music Department has effected the formation of a new band on campus-a Cadet Band.

Capt. Robert L. Eckard, advisor to the band, said the recently organized AFROTC Cadet Band will wear the blue uniform with white accessories. Forty cadets, about 10 of them members of the Marching 100, will practice each Wednesday on the intra-mural field. The band's director is Warren Lutz, who directs the Marching 100.

Capt. Thomas B. Spalding said that some of the musical instruments of the band are owned by the Music Department and some are the property of the members.

The band will perform at the reviews to be held on Saturday mornings, the first of which will be March 26.

#### **English Club** To Hear Stroup

Dr. T. B. Stroup of the English Department will speak on the "British Museum and Its Facilities for Scholars" at a meeting of the English Club at 4 p.m. Tuesday in the Music Room of the Student Union.

## **UK Selected As A Color Center** To Handle New Film Series

The Department of Audio-Visual Service has been selected by Coronet Productions as one of the 11 centers in the nation to handle "Coronet's" new series of color education films.

This selection of UK as a color center recognizes the University as having the best film library in the state, department officials point out.

The UK film services began in 1919. The first films were given to UK by the federal government, and the Extension Department was chosen to direct the showing of these films.

Dr. Wellington Patrick, director of the Extension Department, named Prof. Louis Clifton to establish an audio-visual service in the department in 1926. Prof. Clifton pioneered the little known subject

of audio-visual aids in the state educational system. He realized that future teachers should know the value of teaching by films. Along with Dr. W. S. Taylor, then with the Col-

lege of Education, Prof. Clifton started audio-visual

courses. He taught the first class in 1932. W. Gayle Starnes was named director of audiovisual (a-v) services in 1936. He encouraged an audio-visual major in education, aroused state interest by producing films on UK, and bought some of the first 16 mm movie equipment and sound

Mr. Starnes was called to the Army in 1941 and his assistant, Miss Mary Rees Land, held the post until she resigned in 1946.

Mrs. Ruby Evans Hart succeeded Miss Land in 1946. The film services continued to increase, until in 1954 a total of 1,540 active subscribers throughout most convenient. the south is now serviced by UK's film library.

This number of churches, clubs, and schools is a 250 per cent increase over the number of subscribers

With the exception of two years that the film service received \$5,000 from the University's budget, it has been self-supporting through its rental service off-campus.

The University campus is serviced with free projection and film by 25 part-time student projec-

The Department of Visual Alds has approximately \$660,000 worth of films and equipment. The larger part of this material has been purchased without state funds.

Within the last five years a new delivery truck, 11 new 16 mm projectors, six new slide projectors, a pair of \$4,000 are projects, 12 new screens, and a \$2,500 electronic detector and cleaner have been added to the department.

The library has 3,000 film prints and sent 22,924 reels of films to its subscribers last year.

UK's visual aids program has become so complete and effective that it is now recognized nationally through the "Coronet" project.

## Rush Plans

Rush plans were discussed at a recent meeting of Delta Sigma Pi. Brooks Pitman, recently elected president, presided. Dr. Ralph Pickett, professor of economics, is the faculty advisor.

## Attention Entertainers.

Comedians, singers, pianists, dancers, acrobats, and any and all talented performers who want to entertain . . . gather round! The UK Troupers are holding tryouts at 6:30 p.m. Tuesday, in the laboratory theater in the Fine Arts Building.

The entertaining group, which gives performances all over the state plus an annual "big show" in the UK Coliseum, is interested in getting students who would like to gain practical experience in

\*

#### A Campus-to-Career Case History

## He figures for the future

It's James Kirchhoff's job to look ahead. As a Plant Engineer with Illinois Bell Telephone Company, he helps estimate telephone equipment needs years in advance.

For example . . . when a new real estate development is in the planning stage, Jim figures how much telephone equipment it will need when it reaches its full growth. His estimate is based on his knowledge of

the equipment's potential plus forecasts provided him of the area's rate of development. He then makes a complete report that becomes the basis of plans for the future.

Jim can take a look at his own future, too. In telephone engineering he can see a great many opportunities opening up in the next five years . . . ten years. He can pick the one he wants and start working toward it.

Jim graduated from Northwestern University as an E.E., class of 1952. His progress since then is typical of college men who have chosen telephone careers. If you'd be interested in a similar opportunity, see your Placement Officer for full details. There are also openings with other Bell telephone companies, with Bell Telephone Laboratories, or Western Electric and the Sandia Corporation.

## University Announces Scholarship Test Plans

All students applying for University scholarships are required to attend one of the testing sessions to be held throughout the state. Applicants may select the center which they find

these testing sessions.

The testing sessions will be held at the following places beginning at 9 a.m.: March 28 - Mayfield High School, Mayfield; Morganfield High School, Morganfield; Fleming County High School, Flemingsburg; Morgan County High School, West Liberty.

March 29 - Caldwell County High School, Princeton; Owensboro High School, Owensboro; UK Northern Extension Center, Covington; Hazard High School, Hazard: Pikeville High School, Pikeville; Male High School, Louisville.

Scholarship application blanks | March 30 - Bowling Green High will be distributed and collected at School, Bowling Green; Central City High School, Central City; Owen County High School, Owenton; Somerset High School, Somerset; Paintsville High School, Paintsville.

March 31 - Campbellsville High School, Campbellsville; Elizabethtown High School, Elizabethtown; Barbourville High School, Barbourville; Ashland Senior High School, Ashland.

April 1 - Memorial Hall.

of alcohol with sulphuric acid.

About seven-eighths of an iceberg remains under water. Ether is produced by distillation

#### THE BULL SESSION

I wonder if they still make bull sessions the way they used to. Well do I remember the bull sessions of my own undergraduate days. How cogent they were! How informative! How the good talk crackled and our young hearts leaped and the hours sped by as swiftly as minutes!

Our discussions were always led by Jack Femur. (Good old Jack! I hear he's in the extruded aluminum game now.) We would sit cross-legged in a circle around Jack and he would fill his pipe with his own private blend - burley, latakia, and shredded coconut. The rest of us preferred tobacco, so we would light up Philip Morris. This is a procedure I recommend without qualification to everyone who prefers tobacco because Philip Morris has the tobacco that tobacco-preferers prefer the most - mild vintage leaf with a clean, cool flavor that soothes and steadies, that gladdens and enlivens and refreshes.

Jack would puff on his pipe and we would puff on our Philip Morris and the bull-session would begin its meandering journey. The talk would touch on every subject known to man, on every conceivable thing beneath the sun, but no matter how far the conversation wandered, it would always return to "Topic A." I refer, of course, to gardening.

But, as I say, the discussion would cover many subjects before it came to the inevitable gardening. Jack would open each session with a provocative question of a general nature, like: "What's the most important thing a man can get out of college?"

"Girls," Harold Clavicle would reply promptly. (Good old Harold! I hear he's in the frozen lobster tail game now.) "No, I don't think so," Ben Fibula would say. "I think edu-

cation is the most important thing you get out of college." (Good old Ben! He's still in school.)

"Listen, guys, I've got a question," Clyde Ilium would say. "If you could spend a week either with Ava Gardner or with Albert Einstein, which would you choose?" (Good old Clyde! I hear he's in the unclaimed freight game now.)

"Albert Einstein, of course," Will Mandible would say. (Good old Will! I hear he's in the jack handle game now.)

"What?" Cleanth Patella would cry, astonished. "You would rather spend a week with Albert Einstein than with Ava Gardner?" (Good old Cleanth! I hear he's in the unclaimed freight game with Clyde Ilium.)

"Natch!" Will Mandible would answer.

"But why?" Sol Sacrum-would ask. (Good old Sol! I hear he's

a parking meter in Deal, New Jersey.)

"Because," Will Mandible would cry, "if I spent a week with Albert Einstein, maybe I would get so smart that I would be able to figure out a way to spend more than a week with Ava Gardner!"

Well sir, we laughed until our little uvulas were sore and then we went on to a host of other topics. "Do you think it's important to join a fraternity?" Murray Tarsus would ask. (Good old Murray! I hear he's in the mica game now.)

"Only if you are a boy," Bob Turbinate would answer. (Good old Bob! I hear he's in the sheared raccoon game now. [The raccoon, incidentally, was invented by Milton Raccoon, whose career should be a source of guidance and inspiration to us all. Mr. Raccoon arrived in this country in 1907, penniless and not speaking a word of English. Today he is the Mayor of four of our principal cities.1)

But to get back to the bull session -"What's the best thing to do when the girl you are dancing with insists on leading?" Eric Ulna would ask. (Good old Eric! I hear he's in the flutter valve game now.)

"Hit her with a folded newspaper," George Vertebra would answer. "Never hit a girl with your hand. They learn to associate the hand with food, and you must not confuse them." (Good old George! I hear he's in the folded newspaper game now.)

And so it went - the talk ranging the worlds of the arts and the sciences and the social graces, until we would climb, spent but happy, into our little hammocks . . . I wonder if they still make bull sessions the way they used to.

This column is brought to you by the makers of PHILIP MORRIS, who have been in the tobaceo game for many long years and who tell you now proudly that their product is better than ever.

## Maybe The Dean Is Testing

Association, the Interfraternity Council, and several other student organizations to take a newer- stronger stand on whatever policies they believe are right.

Since the coming of Dean Leslie Leon Martin, members of these various groups, particularly SGA and IFC, have found it increasingly hard to practice leadership, a practice which is just as vital as the other aspects of education at the University.

Dean Martin, who took his new position after working in Personnel, says he has "longrange" policies for the phases of University life with which he has become involved.

By word and by action, the dean has shown that he has little respect for the idea that a university student is capable of any kind of self-government.

Dean Martin has said, in so many words, that SGA is an organization which is capable of carrying out certain long-range policies which he sees as the best policies. One example of this was the dean's move to have SGA attempt to stop drinking in the stands during football games - an action which should have been taken directly by the dean, not through SGA.

By implying that he was running the show, the dean has given little incentive for leadership. An example of this came up recently when IFC tried to block a plan to have compulsory meals for freshmen living in the new men's dorms-a plan which would have seri- in self-government,

Referring to freshmen and sophomores as

Dear Sir:

Dear Sir: You've Goofed

We'd like to urge the Student Government ous financial effects on the fraternity system at UK.

> Dean Martin told the group the decision to have compulsory meals would positively be made and that objection or argument was, in effect, useless. An interesting statement, since Comptroller F. D. Peterson this week said no definite decisions have been made.

> One other group which conflicted with the dean lately is the student section living at Cooperstown. When the dean insisted that a two-way street be made one-way, a vote was taken. That group decided two to one against the plan. It will be interesting to note, in the future, if the street is changed after the "trial period" now in effect expires.

Outward rebellion against the dean would be useless, as well as illogical and contrary to democratic procedure. Instead of rebellion, the students should make it a point to stand up for their beliefs, to stick to their opinions, no 'matter what arguments, 'proofs," or persuasions are given to the contrary. If a course of student action is wrong, it is for the groups involved to discover that fact for themselves—to verify the wisdom or \_\_\_ feasibility of any particular decision as decision as determined by facts.

Perhaps the dean has only been testing these student groups to see what kind of men and women the University is turning out. We hope so, Even when we are wrong, and we are bound to be at times, Dean Martin must realize that the only way we can learn citizenship is through experimentation

ends. There would be more inclination to stay on campus if there were other University-sponsored activities for the students who

don't belong to fraternities and sororities. Other suggestions for solving the parking problem and for alleviating its causes are welcomed by the Kernel and, if they are more than 50 or 100 words, will be run in editorial form in this position in the paper.—Ed.)

The Military at UK gives demerits to students who are late to class. This custom is supposed to date back to the time of George Washington. Which, as Dennis Day said the other day, brings to mind the picture of George standing up in the row boat crossing the Delaware. If he had been on time, he would have gotten a seat.

"Liberty is to faction what air is to fire . . . But it could not be less folly to abolish liberty, which is essential to political life, because it nourishes faction, than it would be to wish the annhilation of air, which is essential to animal life, because it imparts to fire its destructive agency."-James Madison, "The Federalist Number Ten," 1787.

(Mr. Smith has caught us with our defenses down. A more intelligent suggestion to the parking problem would have been to use an age factor instead of a college classification. For example, the Board of Trustees might restrict cars to students 20 years old or older.

Furthermore, as Mr. Smith points out, it should not have been implied that freshmen and sophomores are intellectual babies. Most of them aren't, but it takes a darned good man to resist all the temptations that greet the new student.

Mr. Smith's best point, in our opinion, was his reference to campus activities over week-

#### EARTH

Of the 50 to 100 million possibly inhabited planets, Earth is the only one known, beyond reasonable doubt, to be populated. To some people, Earth is a very small, almost flat, two by four mile plot of land surrounded by ocean and fish, and sunshine and cockroaches. To others, it is a larger terestrial chunk, hemmed in on one side by the east coast, and on the other side by tourists and movie stars, and the world's largest trees. It is an area criss-crossed in such a way that almost every conceivable find the Earth 80 times as bright yawning and yelling "est squarus," spot may be made to be visible as our moon appears to us when old Nero produced his \$2.95 violin. through the picture window of the observed from Earth. #### The Asylum

#### **Party Secrets** Given By Asylum

By BILL BILLITER

"Here comes good ol' Joe; now the party will really begin!' Six million college students dream of having this moronic statement made in their favor. It seems that everyone likes to be

the "good ol' Joe," simply because everybody likes to be the life of Now it is ridiculous that anyone

should want to be the life of the party. If the party needs life, it's obviously such a boring affair that the guests should have stayed

Furthermore, it would seem apparent that a sane person goes to

a party to be entertained. Why any stoop would go for the sole purpose of being the entertainment is beyond human ken. However, it takes a lot of idiots to make an asylum.

The whole business is undoubtably of commercial nature. Some die-hard business and novelty firms hit upon the idea eons ago. They found that if they could convince the social squares that their products were the key to being a party stopper, they could stay in the chips in-

The life of the party business has roots in antiquity. The story goes that Nero was once the biggest social dud in Rome. Nero, realizing this, took a correspond-

Lo, and behold, the Emperor Returning by way of our moon, Nero's next party was a real blast. we get a closer view of home. We Just when his togaed guests were

Now the novelty firms of today

The formula for instant popularity (according to the ads) is to drag out the uke during a lull in the party. Strum the thing a few times, and just watch how everybody turns in your direction. After all, they could hardly ignore you.

A co-ed is turtner advised to wear a genuine grass skirt, while plunking on the ghastly little guitar. The theory is that her playing may be lousy, but with a little simulated hip action nobody notices the uke anyway.

The uke is not the only sure-fire method of being the life of the party. A male can always don those obnoxious little bow ties that light up in the dark. A co-ed can always wear a smelly perfume.

Better yet, one can insure popularity by his knowledge of useful skills. Imagine the look of the guests when you charm your \$1.98 pet cobra from its imported basket. Or just think how clever you can be stacking a pile of greased BB's.

You might even try singing. If students, will attend the first an- everyone at the party is staring insipidly at their drinks, break Earth is known to be an oblate eign Service Seminar at the Uni- forth with an aria from "Madame spheroid, that is, flattened at the versity of Cincinnati on March Butterfly." This never fails to startle the guests.

The top-notch life of the party is coy about his talents. We once ears, and cross her eyes until somebody noticed her-

So if you think that you're a come well equipped with your uke, your playing cards, your pet giraffe, your yo-yo, and your blind

## COLONEL of the WEEK

Melvin Smith

The Stirrup Cup proudly presents the "Colonel of the Week"-Melvin Smith, a senior geology major with a 3.3 standing.

Melvin works for the Kentucky Geological Survey and is, at present, doing ground water research. He is president of SGE, a geological organization.

Although he's from Owenton, Melvin traveled extensively (mostly under water) before coming to UK. After two months of high school, he joined the naval submarine service for two years. That high school diploma will just have to wait until he gets his college sheepskin in June!

Melvin is invited to enjoy two free, delicious meals at the Stirrup Cup.

## **'28 Grad** Given Post

Lombard Squires, '28, formerly of Plainfield, N. I., has been appointed chemical director of the pigments department of the Du Pont Company, succeeding Dr. James E. Booge, who will retire April 30.

Until his recent promotion, Mr. Squires has been director of the technical division of the Atomic Energy division of the Explosives Department for Du Pont. The change of assignments took place

Mr. Squires joined the company in 1938 as a chemical engineer at the Experiment Station and four years later he became a technical specialist in the wartime atomic energy program conducted by Du Pont for the government.

In 1944 he became a chief supervisor of the Hanford Engineer Works, the government atomic energy plant, and in 1945 was made its technical superintendent.

After the war he was assigned to various technical and production positions in the company, including that of assistant chemical director of the Polychemicals Department.

The position he held at the time of his new appointment on Feb. 1 came in 1950 after the company had agreed to build and operate the government's Savannah River atomic materials plant.

Mr. Squires attended the University of Illinois before transferring to UK where he was graduated in 1928 with a B.S. degree in chemistry. He later took graduate work at M.I.T. where he served as instructor from 1930 to 1937.

He is a member of Phi Delta Theta and Sigma Xi. His home is at Westtown, Pa.

1915

Charles B. Elston, '15, active as a county agent in Kentucky for the past 33 years, retired last No-

A native of Henry county, Mr. Elston served three years in the Army after his graduation from UK in 1915. Later he served as a civilian in charge of the 1,800 mules at Camp Knox, used in the construction of that installation.

He began his Extension Service career in Marion county, and served in Lincoln, Nicholas, Nelson and Breathitt counties.

1935

Charles Bringardner, of Lexington, a 1935 UK graduate, was elected vice president of the Appalachian Hardwood Manufacturers, Inc., at its annual meeting held last January in Cincinnati.

# You don't have any choice on the first and very little on the second . . .

On the third however, it's strictly up to you—
a poor choice can throw you years behind your
classmates and a good choice can put you years
ahead.

At Chance Vought, young engineers

(Aeronautical, Mechanical, Civil and Electrical)

have every opportunity to make a mark for
themselves in the industry that places the greatest
value on engineering skill and ingenuity.

The very nature of the modern aircraft—its
immense complexity and its never-ending
development—presents technical problems that
are unparalleled in any other field of engineering.

The chart illustrates two things; first, the extent to which our work involves the various engineering and scientific specialties and second the scope of the opportunities that exist for the young engineer.

For more information regarding these employment opportunities please contact your placement office in order to arrange for an interview with our representative when he is on campus, or write for a copy of "Your Career With Chance Vought Aircraft".

Address:

We invite you to discuss your career opportunities in the aviation industry with us. Contact your placement office today for an appointment for your interview with H. B. Gibbons, Chance Vought Aircraft Engineering Personnel Representative, who will visit your campus Feb. 28-March 1.

## UK Men Are Hard To Please!

By BOB HORINE

There's not one girl on the UK campus with a 3. standing.

Academic - wise, there are plenty of them. But according of English and Pre-Med students, not one measures up to a 3. beauty standing.

This anonymous bunch of pollsters base their findings on a representative experimental group of girls who drink various things in the grill on Tuesday and Thursday

The 3. is the ultimate in classical beauty. The system was borrowed from an Oberlin (Ohio) student who in turn got his idea from an elementary philosophy course.

When a young blade refers to a co-ed as the "most," he seldom stops to consider several vital factors. So she has a 40-inch bust, 30-inch waist and 40-inch hiplineso what? If she smokes she loses at least one-tenth of a point. After all, her lungs might be injured.

Drinking is another point to note. Injury to the body tissues or maybe eventual alcoholism may result.

Such things as hair styling, facial lines, body contours, knees, elbows, ears, bands, feet (if visible), legs (bowed or vice versa), face paint, grooming, grace of movement, and proportioning of limbs are factors in the rating sys-

A couple of group firsts: The female ear should be hidden by hair because this is an unsightly appendage;

A girl should be balanced. That is, there should be as much of her on the right side as on the left.

## Rotary Club To Mark Its 50th Year

Many members of the University staff are assisting in the Rotary Club's fiftieth anniversary celebration.

The oldest and largest of all men's civic clubs, the Rotary was founded on Feb. 23, 1905 in Chi-

Dr. Merle Baker, associate professor of mechanical engineering; Dr. Howard W. Beers, head of the department of sociology; Thomson R. Bryant, past associate director of the agricultural extension; Dr. C. C. Carpenter, dean of the College of Commerce.

Dr. Thomas Poe Cooper, former dean of the College of Agriculture: Bruce F. Denbo, director of the university press; President H. L. Donovan; Elgan B. Farris, chief engineer; B. W. Fortenbery, field

agent in agronomy. Staff members who are active in the Lexington Roatry Club in-

Dr. Wesley P. Garrigus, associate director of agricultural experiment station; Daniel J. Jones, state geologist; Dr. K. O. Lange, director of aeronautical research laboratory; Dr. M. E. Ligon, professor emeritus of education.

Other active members who are on the university staff are Bart M. Peak, executive secretary of YMCA; Dr. H. Bruce Price, professor of agricultural economics; Dr. Don Cash Seaton, head of the department of physical education; Robert E. Shaver, head of the department of civil engineering; Elvis Jacob Stahr Jr., dean of the College of Law.

Dr. Rhea A. Taylor, assistant professor of history; D. V. Terrell, dean of the College of Engineering; Dr. L. S. Thompson, director of the university libraries; Dr. Frank J. Welch, dean of the College of Agriculture.

Dean Stahr is president of the Lexington club, while Mr. Peak, former district governor, is secretary. The Lexington club, founded in 1915, was the second to be organized in Kentucky. The first being located in Louisville.

## Young specialist in community relations makes friends in 101 plant cities

General Electric now has 131 plants in 101 cities, and one problem is common to all: How can the company show people in every community that it is a good neighbor?

This responsibility is shared by many and stimulated by 32-year-old John T. McCarty. His job: Consultant, Program Services in Plant Community Relations.

#### McCarty's work is varied, exciting

McCarty's assignment is to help each of the General Electric plants tell its neighbors what it is doing, what it hopes to do, and how it fits into the community.

He must be ready to travel to 26 states. He prepares community-relations manuals for use in all 101 plant cities. He supervises surveys of community sentiment, and tests the local effects of the company's advertising. And he helps plant management maintain friendly contacts with civic, religious, educational and other community leaders.

#### 23,000 college graduates at General Electric

This is a sensitive and important job. McCarty was readied for it in a careful stepby-step program of development. Like Mc-Carty, each of the 23,000 college-graduate employees is given his chance to grow, to find the work he does best, and to realize his full potential. For General Electric has long believed this: When fresh young minds are given freedom to make progress, everybody benefits - the individual, the company, and the country.

No Comment

Norman E. Isaacs, managing editor of the Louisville Times, enjoys a Kernel photograph while Edgar E. Easterly, bureau chief of the Kentucky Associated Press, gets an eyeful over his shoulder. We aren't saying for sure, but the picture they seem to be enjoying just might have been cheesecake. They appeared this week in the first of a series of lectures sponsored by Sigma Delta Chi, professional journalism fraternity. Easterly is president of the Louisville chapter.

## Pledges Plan New Council

Pledge presidents of all sororities met Tuesday to draw up plans to establish a junior Panhellenic. Carolyn Collier, Chi Omega, was elected temporary chairman and Harriet Hart, Kappa Alpha Theta,

was chosen as reporter.

The new organization will be a sub-committee of senior Panhellenic. A president, vice president, secretary, and treasurer will be elected, and meetings will be held

Members will consist of two representatives from each pledge class and one representative from senior Panhellenic. The president and a rotating member will attend each

Proposed programs for meetings include discussion of Panhellenic rules, rush rules, and the history and purposes of each sorority.

The temporary committee will neet at 4 p.m. Tuesday to discuss further plans. Junion Panhellenic will begin its regular meetings on March 8.

#### Golf Candidates Report Tuesday

A meeting of all candidates who wish to come out for UK's golf team has been called by Coach John Owens.

Coach Owens wants any and all interested golfers to talk with him in the squad meeting room of Memorial Coliseum, Tuesday, March 1, at 7:00 p.m.

## Journalist Gives Advice To Students

Norman Isaacs, managing editor of the Louisville Times, speaking to UK journalism students Monday, laid down one primary rule to follow when making a decision about publishing an item:

"Is it news and is it essentially truthful? If so, it should be printed."

Isaacs was the lead-off speaker in a 13-lecture series being sponsored by the Louisville chapter of Sigma Delta Chi, professional journalism fraternity.

The second lecturer in the series will be James S. Pope, executive editor of the Courier-Journal and the Louisville Times and president of the American Society of Newspaper Editors. He will speak on "Editorial Production Problems," at 2 p.m. Monday, March 7, in room 211 of the Journalism Building.

Isaacs advised the journalism group to "treat everybody alike when you have the power of the press."

Various pressure groups — both good and bad — are continually preying upon newspaper editors, he said.

"No matter what level of journalism you enter, don't try to be a 'phony' and don't do anybody a favor in the name of your newspaper," Isaacs warned.

He listed the news columns as containing the "real guts of news-papering" and not the editorial

The printed word is one of the most explosive things there is, Isaacs explained, with at least two million mistakes that can be made in newspaper work.

A community begins to feel the need of the press when the area is without a newspaper, he remarked.

The speaker was introduced by Ed Easterly, Kentucky bureau chief of the Associated Press and president of the Louisville chapter of Sigma Delta Chi.

Dr. Niel Plummer, director of the School of Journalism, presided.

#### Physics Colloquium Set For Wednesday

F. C. Maienschein of the Oak Ridge Laboratories will address the physics colloquium in room 208, Pence Hall at 4 p.m. Wednesday, Feb. 23. He will speak on "Scintillation Spectroscopy Applied to Nuclear Reactors."

clear Reactors."

Tea is to be served at 3:30 p.m. in the Physics Library, preceding the lecture.

## EGAD! MORE LUCKY DROODLES!

ELEVATOR ARRIVING AT 5TH FLOOR OF 3-STORY BUILDING

Gary R. Dierking University of Kansas

WHAT'S THIS? For solution see paragraph below.

IN THE DARK about which cigarette to smoke? Take a hint from the Droodle above, titled: Two searchlight crews, one asleep, one enjoying better-testing Luckies. Your search is over when you light up a Lucky. You'll find out why college smokers prefer Luckies to all other brands, as shown by the latest, greatest college survey. Once again, the No. 1 reason: Luckies taste better. They taste better, first of all, because Lucky Strike means fine tobacco. Then, that tobacco is toasted to taste better. "It's Toasted"the famous Lucky Strike process-tones up Luckies' light, good-tasting tobacco to make it taste even better . . . cleaner, fresher, smoother. So, enjoy the bettertasting cigarette . . . Lucky Strike.

**Armed Forces Network** To Carry UK-Tide Game; NCAA Tickets On Sale

By GEORGE KOPER, Sports Editor

This 25th edition of Adolph Rupp's Wildcats isn't the greatest team he has ever assembled, but it's probably been more surprising than the rest of them put together.

About a month before the start of the current campaign, most crystal ball experts were counting the Cats out of it for this season. And they weren't entirely without reasons. Gone were the "Big Three" of Cliff Hagan, Frank Ramsey and Lou Tsioropoulos, the trio that accounted for over 80 per cent of UK's total offense last year. Billy Evans was the only consistent starter returning from the unbeaten 1953-54 combine.

Three of the other returnees had seen some action, but none had broken into the starting line-up on a regular basis. The only big man was an untested junior-college transfer who had made the all-American team in that circuit twice but had never faced major opposition. Add to that a bench made up for the most part of inexperienced sophomores.

It's easy to understand why Kentucky was not ranked with the nation's best in any of the pre-season polls. Sport magazine even left them out of the top 20 in the country. Coaches figured if they were ever going to beat Rupp, this was the year. Next season he would be loaded, but for the present he was in for a long campaign.

They were right. It has been a long campaign-long for opponents of Kentucky. A team that wasn't figured to be anywhere near the top and here they are second in every major poll. They've looked like champs on some occasions and like chumps on others. The Cats have faced about every misfortune possible during one season. Of the original starting team only three are left and one of them will be gone by tournament time. Yet they own 19 victories against only two set-

This has been a tremendous season for Kentucky, no matter what happens from here on out. Coach Rupp and his assistant Harry Lancaster have done an outstanding job in moulding this squad together. And those untried sophomores have come through like seasoned veterans when called upon. Earl Adkins, John Brewer, Ray Mills and Gerry Calvert have developed into steady, dependable performers, especially important since two of them will be in starting can be noted as having knocked roles if Kentucky reaches the NCAA play-offs.

Another who has come through but could hardly be considered inexperienced is Gayle Rose. The Paris, Ky. senior held down a starting position through the first half of last season but was relegated to a reserve role until Linville Puckett's departure. Rose has more than held his share since breaking back into the starting line-up.

Servicemen throughout the world will hear the all-important Kentucky-Alabama tilt Monday night through the facilities of the Armed Forces Network. The network includes 77 stations located in Europe, Africa and South Central America, along with all the ships at sea. They plan to make a tape recording of Claude Sullivan's play-by-play description for rebroadcasting over the network.

Work is nearing completion on the new football equipment building adjacent to the practice field, located behind the new men's residence hall on Rose Street. Completion of the building means that football operations, except for games, will be shifted completely to the Rose Street area. The new structure will make dressing rooms, practice field and living quarters more convenient because of their nearby

Tickets for the first round of the NCAA playoffs arrived Wednesday and are on sale in the Coliseum ticket office. Prices are \$2.50 for side seats and \$1.50 general admission.

# 'Bama-UK Struggle Plainsmen Could Decide Title Test Cats;

By TOM PRESTON

Lock the doors and bar all windows! Alabama is coming to town Monday night and most observers predict the Coliseum will never be the same after this allimportant SEC battle.

Coach Johnny Dee will pull every trick from his oversized bag of basketball surprises in trying to smack down Kentucky and rule as conference king.

The Tide's chance for a victory sweep in their final three games is doubtful. Reason one for their probable unsatisfactory journey is that they face Tennessee, Kentucky, and Auburn. That in itself is a mighty rough bridge to cross. Reason two is that Kentucky on their home floor just isn't about to be unseated from their annual SEC throne.

Alabama's "Rocket Eight" is commanded by a great center, 6-8 Jerry "Moos" Harper from Louisville. The rugged 220-pound junior is the Tide's hopeful all-American candidate.

Harper who played high school ball at Louisville Flaget, is hitting a clip of 21 plus points a game

and is one of the nation's leading rebounders.

So not only will fans witness a thrilling team battle, they will also eve a full-of-fire contest from the center slot. Bob Burrow, UK's big pivotman, has carried quite a chunk of weight on his shoulders, especially since Kentucky started its string of hard luck.

There's much speculation as to who is the better center, Burrow or Harper. Monday night could

Surrounding Alabama's big gun are 6-3 Dennis O'Shea and 6-4 Bob Linn at forwards, Bill Crews, 5-11, and Leon Marlaire, 6-1, guards.

UK and Alabama are currently tied in SEC league standing with identical 9-2 marks. Coach Dee's squad commands an overall 17-4 record, their losses coming from St. Louis, Texas Christian, Florida, and Vanderbilt.

Three of the setbacks were by less than six points. Only Vandy the Tide cold. They stomped them 78-57.

So much depends upon this game. If Kentucky and Alabama win Saturday night, Kentucky takes the Tide Monday, and downs

UK wins the championship. If the Blue and White drops one

Tennessee in their final tilt then

#### **Baseballers Meet** At Coliseum

- Baseball Coach Harry Lancaster has announced a meeting for varsity candidates, particularily returning lettermen, in the Coliseum projection room, Saturday at 11:00 a.m.

A freshman baseball meeting will be held in the same room Saturday, March 5.

PERSONAL LOANS Designed Especially for **UK Faculty and Personnel** UP TO \$300

PAYMASTER LOANS

117 Cheapside Dial 2-7616

to either Auburn or Tennessee but stops Alabama they can still win the race. Because if Coach Dee's quint loses to UK but wins the

JERRY HARPER

other two they will tie again for the standing and a playoff for an sir, it's a might important fray.

The game has been a sellout for weeks.

Auburn, unable to capture the SEC championship, meets Kentucky Saturday night in Memorial Coliseum and is very anxious to improve their 11-5 overall record.

There is little doubt as to the amount of action that will go into this game, especially since Kentucky is shooting for the SEC title and eyeing Monday night's battle with Alabama. Also, Auburn needs wins from here on out to capture a decent position in the conference standings.

Baron Adolph Rupp once again has a question mark running around in his already weary mind as to the condition of Jerry Bird's bum ankle. Latest reports state that the limb is painfully sprained and the 6-6 forward's chances of starting are in question.

But if the ankle responds to treatment as is hoped, Bird will be a starting forward in the Au-

Probably Bird's forward partner will be John Brewer, a 6-3 sophomore who replaced injured Cookie Grawemeyer in the Vanderbilt tilt. Of course Bob Burrow will rule the pivot slot while Capt. Bill Evans and Gayle Rose will hold down the guard posts.

Auburn's little Bill Kirkpatrick, 5-10, is the man to watch since he is averaging over 20 points a game. NCAA berth will be necessary. Yes The Plainsman isn't the only little member on the starting five. His running mate at guard, Bronie Nelson also stands 5-10.

Kentucky's freshman cagers aged to hit the scoring column. ended their home season Monday Vernon Hatton led Kentucky with night by defeating Cumberland 17 points, but had to give up scor-Junior College 96-50 in a pre- ing honors for the game to Glen Alpha Xi Delta Wednesday, and liminary game to the UK-Vander- Clarkston of Cumberland, who had Delta Zeta met Hamilton House bilt tussle.

The win brought Coach Harry Lancaster's Kittens' season record to eight wins and four defeats.

In the first half, Coach Lan-caster started his second team Silly Ray Cassady with 12 each, which consisted of Billy Smith and Smith with 11, Butcher with 8, Harold Ross at the forwards, Dick Collinsworth and John Crigler 6 head on March 10 since some of Howe at center, and John Lee each, Howe with 5 and Ross with their team were involved in an Butcher and Lincoln Collinsworth 4. at the guards. This combination, along with the first team, set a blistering pace and ran up a 56-24

In the second half the Kittens started slowly and with 11:43 to go in the game they led 72-34. They continued to have trouble with their shooting and with 8:55 to go Kentucky had a 75-41 lead.

Then the frosh started hitting. They built their margin to 86-48 with five minutes remaining. The Kittens continued their hot spree and easily defeated Cumberland, 96-50. It was the yearling's second victory of the season over the Cumberland five.

In their 96 point production performance, all UK players man-

## Rifle Team Scores Win At Cincy

· UK's varsity rifle team won the second round match in the southern division of the Ohio-Kentucky Intercollegiate Rifle league last Saturday in Cincinnati, Ohio.

The win puts UK in second place in the eight-team league, five points behind Miami. Besides Kentucky and Miami, other teams in the southern division are Cincinnati and Xavier. Northern division teams are Ohio State, Dayton, Ohio University and Ball

UK had a 1386 team score. C. D. Combs, a senior from Hazard, was the top individual shot with 286. Other UK team members scores were Frank Canfill, 279, Joe King, 273, Charles Wilson, 277, and Layle Barker, 271. All members of the UK team are native Kentuckians.

A third round match will be fired tomorrow at the University of Cincinnati.

Nine men fire for each team and the top five scores are computed as a team score. All matches are three position matches-prone, kneeling, and standing. Five rounds are shot during the season and teams in each division alternate as hosts. UK was host for the first round match of the southern division and finished third.

## Schnellenberger, Hardy Named Co-Captains For '55 Grid Season

The football team has elected Bob Hardy and Howard Schnellenberger to serve as co-captains of the 1955 grid team.

Hardy, a junior from Paducah, and Schnellenberger, a junior from Louisville Flaget, were standouts on Blanton Collier's first edition of the Cats. Hardy was an all-Conference selection at quarterback while Schnellenberger was named a second team end.

The 6-2 Schnellenberger broke into the starting line-up as a freshman during the two-platoon days, holding down the regular defensive end position. He came into his own offensively last year, leading the team in pass receiving with 19 catches, three of them for touchdowns. Howie is probably best known, however, for his game winning catch in the Tennessee

Spring practice for the gridders is scheduled to start Monday, weather conditions permitting. Collier has been trying to get the drills underway for nearly two weeks but adverse weather has halted every effort.

#### WAA Cage Meet In Full Swing

The Women's Athletic Association opened its basketball tournament Monday afternoon with Kappa Kappa Gamma losing to Alpha Delta Pi by default and Chi Omega winning over Patterson Hall 20-18.

In the remainder of the first round of the tournament, the Tri Delts played Jewell Hall Tuesday, Kappa Alpha Theta played Boyd Hall and Dillard House played Thursday.

The regular W.A.A. basketball Behind Hatton in the Kitten team will play Cincinnati here scoring column were Phil Johnson March 3, and there again on March 8. Berea is scheduled for there on March 5. There is much doubt about the game with Moreaccident last Saturday.

Yardley brings you months and months of shaving luxury-London style

From London, the world's center of fashions for men, comes the Yardlev Shaving Bowl. This distinguished soap - imported from England and packaged in America - should give you up to six months of shaving luxury. The rich lather wilts the beard, soothes the face and softens the skin in wondrous fashion. At your campus store, \$1.25. Makers and distributors for U. S. A., Yardley of London, Inc., New York.

## Professor To Analyze Paintings

The paintings and drawings now on exhibition in the Fine Arts Gallery of two well-known artists will be analyzed and compared by Prof. Edward W. Rannells of the Art Department at 3:30 p.m. Sunday in the Gallery.

The artists, Luis Eades and Paul Chidlaw, approach their art from different stand-points, which the speaker hopes to clarify in his in-

formal talk. Mr. Rannells asserts that the character and feelings of an artist are evident through the medium of his artistic expression, and

Eades and Chidlaw are excellent examples. Whereas Eades, a Spanish-born Britisher, approaches his work from an intellectual side, Chidlaw is more of an intuitive artist who

produces. The exhibition of these artists has been unusually popular, attracting more than 700 visitors to the Fine Arts Gallery since its opening two weeks ago.

#### Whitman Exhibit Now On Display

An exhibit of Walt Whitman's manuscripts and papers is now on display in the lobby of the Margaret I. King Library.

This year marks the one hundredth anniversary of the publication of Leaves of Grass, by Whitman. The exhibit is in honor of this anniversary.

The collection was loaned to the University Libraries by Charles Feinberg, a Detroit businessman, and is valued at several hundred thousand dollars. It is considered by many to be the world's best collection of Whitman material.

Whitman was the originator of the "free verse" tradition in American poetry.

#### Interviews Set

A. W. Moise, personnel director for the Ralston-Purina Company, is visiting the College of Agriculture and Home Economics this week to interview prospective seniors who would like to enter the business of selling feed or one of its related fields.

The Ralston-Purina Company sends a representative to the University each year. Several students join its selling staff annually as a result of these interviews.

#### **Survey Team Visits** Air Science Dept.

The Educational Survey Team from Air University and Air Force ROTC Headquarters, Montgomery, Ala., visited the Department of Air Science on Wednesday and Thurs-

The team consisted of Perry B. Graybill and Maj. James D. Deatherage.

Some of the areas they surveyed were methods of instruction, curriculum, educational objectives, audiovisual and other visual aids, student personnel services, and educational administration.

Atomic energy engineers of North American Aviation's Nuclear and Manufacturing Department measure the background radiation level around a water-boiler type atomic energy reactor. Concrete blocks, used to shield the reactor, have been removed, showing the tankline housing where the graphite reflector and core are located.

## English Film On Schedule

"The Devil and Daniel Webster," the next movie in the '54-'55 Campus Cinema program, will be shown in the University School Auditorium at 8 p.m. Thursday.

The 106-minute English film is a winner of an Academy Award for best musical score in 1941. It is a film adaptation of Stephen Vincent Bent's famous story about the New Englander who sells his soul to the devil.

The man tries to renege and is brought to trial before the great

traitors of the past. Walter Huston, Simone Simon, and James Craig star in the
